

PK125-2 Two-speed

Brida: 125mm

Airflow max.: 220/400m³/h

Rendimiento: 63W

AC Input: 230V 50/60Hz 0.29A

Tmax: 42°C

Dimensión: 244mm x 220mm (w/h)

Peso: 2.28Kg (2.94Kg peso bruto)

The Prima Klima PK125-2 is highly efficient Two-speed inline duct fan equipped with an ebm-papst RadiCal centrifugal motor with backward curved blades which has been optimally adapted to the housing. The device is extremely silent when is switched to low speed. The entire housing is made of high impact resistant, flame proof polyamide (nylon). Maintenance free long lasting ball bearings contribute to especially smooth running of the motor. The connections, capacitor and control system are fully integrated into the housing. With the use of the supplied mounting bracket the fan can be easily and safely attached to the wall or ceiling in any position. Available in a 115V version and with alternative connection cables.

Features:

- *ebm-papst RadiCal motor*
- *Impeller with backward curved blades*
- *Low power consumption*
- *Low noise emissions*
- *Aerodynamically optimised shape*
- *Impact resistant and durable housing*
- *Connection and control system in the housing*
