

K1614

Flange: 315mm

Length: 1000mm w/o flange

Diameter: 415mm

Max Airflow: 3600m³/h

Optimal Airflow: 2400m³/h

Incl. pre-filter: K1714

Weight: 33.2Kg

Activated carbon: 28.1Kg

Pallet Quantity: 12 pcs

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a active surface area of >1200m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilator: PK300/315

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
