

### **K1614**

Brida: 315mm

Longitud: 1000mm sin brida

Anchura: 415mm

Airflow max.: 3600m<sup>3</sup>/h

Airflow opti.: 2400m<sup>3</sup>/h

Incluye pre-filtro: K1714

Peso: 33.2Kg

Carbón activo: 28.1Kg

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a surface > 1200 m<sup>2</sup>/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

***Recommended ventilator: PK300/315***

#### ***Features:***

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
