

### **K1615**

Flange: 315mm

Length: 1250mm w/o flange

Diameter: 415mm

Max Airflow: 4700m<sup>3</sup>/h

Optimal Airflow: 2800m<sup>3</sup>/h

Incl. pre-filter: K1715

Weight: 42Kg

Activated carbon: 35.1Kg

Pallet Quantity: 8 pcs

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a active surface area of >1200m<sup>2</sup>/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

***Recommended ventilator: PK300/315***

#### ***Features:***

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
