

K1615

Brida: 315mm

Longitud: 1250mm sin brida

Anchura: 415mm

Airflow max.: 4700m³/h

Airflow opti.: 2800m³/h

Incluye pre-filtro: K1715

Peso: 42Kg

Carbón activo: 35.1Kg

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a surface > 1200 m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilator: PK300/315

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
