

K1603

Flange: 125mm
Length: 400mm w/o flange
Diameter: 205mm
Max Airflow: 460m³/h
Optimal Airflow: 360m³/h
Incl. pre-filter: K1703
Weight: 5.2Kg
Activated carbon: 4.1Kg
Pallet Quantity: 96 pcs

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a active surface area >1200m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilators: PK125-L, PK125-2, PK125-TC, PK125-ECblue, PK125EC-2

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
