

K1607

Flansch: 160mm

Länge: 500mm ohne Flansch

Breite: 240mm

Airflow max.: 720m³/h

Airflow opti.: 460m³/h

inkl. Vorfilter: K1707

Gewicht: 7,9kg

Aktivkohle: 6,2kg

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4-cm deep bed of first quality, highly activated CTC75 carbon with a surface > 1200 m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilators: PK160-A, PK160-L, PK160-2, PK160-TC

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
