

K1610

Flange: 200mm

Length: 800mm w/o flange

Diameter: 280mm

Max Airflow: 1650m³/h

Optimal Airflow: 1150m³/h

Incl. pre-filter: K1710

Weight: 17Kg

Activated carbon: 11.8Kg

Pallet Quantity: 24 pcs

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a active surface area of >1200m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilators: PK200-A, PK200-L, PK200-2

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
