

### **K1611**

Flansch: 250mm  
Länge: 750mm ohne Flansch  
Breite: 330mm  
Airflow max.: 1800m<sup>3</sup>/h  
Airflow opti.: 1200m<sup>3</sup>/h  
inkl. Vorfilter: K1711  
Gewicht: 17,2kg  
Aktivkohle: 13,4kg

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4-cm deep bed of first quality, highly activated CTC75 carbon with a surface > 1200 m<sup>2</sup>/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

***Recommended ventilators: PK250-L1, PK250-XLE, PK250-ECblue, PK250EC-TC***

#### ***Features:***

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
