

K1611

Brida: 250mm
Longitud: 750mm sin brida
Anchura: 330mm
Airflow max.: 1800m³/h
Airflow opti.: 1200m³/h
Incluye pre-filtro: K1711
Peso: 17.2Kg
Carbón activo: 13.4Kg

The Prima Klima Industry Line premium carbon filters are characterised by a remarkably high durability and an incomparable odour adsorption. The filters are refillable and have a 4cm deep bed of first quality, highly activated CTC75 carbon with a surface > 1200 m²/g. This ensures an exceptionally long contact time between air and carbon, which is highly effective for removing odours. High-quality metal press parts provide maximum stability and durability. The extra-long flange provides a secure connection.

Recommended ventilators: PK250-L1, PK250-XLE, PK250-ECblue, PK250EC-TC

Features:

- *High durability*
- *Effective particle adsorption and odour removal*
- *4cm deep bed of highly activated carbon*
- *Optimal contact time*
- *Refillable*
- *High quality metal parts*
- *With pre-filter against dust*
