

CANNA COGr Vega

CANNA COGr Vega is a complete professional nutrient for the growing period of plants in COGr boards. COGr Vega ensures healthy and strong plants that produce long, vigorous growth shoots.

COGr Vega contains all the essential elements for optimal growing. COGr nutrition also contains pH-stabilisers and humic and fulvic acids. COGr nutrients in combination with COGr growing substrate are the ideal combination for the experienced and demanding grower.

User Instructions

- Shake bottle well before use
- Fill nutrient reservoir with water
- Add CANNA COGr Vega to the nutrient reservoir with the dilution ratio 1:250 (400 ml A and 400 ml B per 100 L of water) Add COGr Vega A to the nutrient reservoir Stir well, then add COGr Vega B
- Again, stir well and let mixture stand for some hours
- The EC of COGr Vega dissolved in (tap) water varies between 1.8 - 2.4 mS/cm² (= the solution EC + the water EC)
- Recommended pH: 5.5 - 6.2
- When growing, intensively feed the plants 1-3 times a day with this nutrient and make sure the drain will be between 10% and 20% and/or flush with water every 1-2 weeks.

Storage, health & safety and other directions

- CANNA developed COGr Vega specially for the growing phase of the plant
- Do not mix A & B concentrate directly; Insoluble combinations will occur which the plant cannot absorb
- Store closed in a dark and frost-proof place (UV light breaks down iron chelates in the nutrient)
- Keep out of reach of children

Warranty / Guarantee

CANNA only works with high graded nutrients and chelates, which are immediately and completely available for the plant. The bottle is made of polyethylene (PVC and cadmium free), an easily biodegradable and recyclable plastic.
