

## CANNA pH+

Maintaining the right pH-value is crucial to your plant's ability to take up nutrients. That's why CANNA developed the pH-series. This series contains pH-adjusters which can be applied throughout the complete cultivation cycle. To bring the pH down, there is CANNA pH-. To adjust the pH upwards you can use CANNA pH+.

In order to adjust the pH upwards there is CANNA pH+. This product is suitable for both the growth and the flowering phase. CANNA has two different solutions of CANNA pH+. One of 5 % for small adjustments and one of 20% for larger corrections

### Direction of use

The phase of the plant is not important if you are raising the pH with CANNA pH+. CANNA has two different solutions for raising the pH, one of 5 % for small adjustments and one of 20% for larger corrections. Add pH adjuster in very small doses (14ml) to the nutrient tank, checking the value of the pH level until desired pH level is achieved (6.2). Stir well before every measurement.

### Warning

- Causes severe burns
- Keep locked up and out of the reach of children
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
- Wear suitable gloves and eye/face protection
- Take off immediately all contaminated clothing
- In case of accident or if you feel unwell seek medical advice immediately (show the label where possible)

### Contains

potassium carbonate 5% potassium hydroxide (KOH)  
13% potassiumoxide (K<sub>2</sub>O)
