

Hesi

BOOSTER

Hesi Root Complex

Hesi Root Complex is an elixir for clones and young plants, but also for mother plants and plants under stress.

Root Complex is a combination of trace elements with vital components (vitamins, amino acids, plant sugars and enzymes) that provides young plants with an optimal start.

In addition, Root Complex ensures a thicker stem and a strong root system.

After repotting and other stressful circumstances, Hesi Root Complex improves the overall condition of the plant. Root Complex stimulates a maximum colonization of healthy micro-organisms in the medium.

Root Complex is ideal for mother plants and clones.

Add some Hesi Root Complex to the mother plant a few days before the **clones are cut**, this will ensure that the new plants will already have all the required substances for taking root rapidly.

Plants that have been cared for using Hesi Root Complex have a perfect start and are healthy and strong!

WE PLANTS ALSO FEEL STRESS. REPOTTING, FOR EXAMPLE, IS HUGEY STRESSFUL, AS WE THEN HAVE TO FORM NEW ROOTS BEFORE WE CAN GROW PROPERLY AGAIN.

CHANGES IN LOCATION AND LIGHT ALSO CAUSE US STRESS. ROOT COMPLEX HELPS TO NORMALIZE OUR METABOLISM FAST!

USE: pour in the feeding water, this can also be done in combination with SuperVit, PowerZyme and other nutrients.

For young plants: 1 to 2 times a week until the plants grows well.

In case of stress: 1-2 times

With regularly use over a long time, half this dosage is enough. (e.g. for mother plants)

Dosage:
50 ml / 10 L
With long-term use:
25ml / 10 L

**Can be used on all systems:
Soil, Hydro and Coco**
