

Vita Race is an iron spray for the growth phase and the first three weeks of the flowering phase. Iron is an important component of chlorophyll. Chlorophyll stimulates the photosynthesis process and makes the plant look healthy and green. Therefore, the plant can easily produce energy for growth and flowering which ensures an optimal end result.

#### Instructions

Shake well before use. Add a maximum of 5 ml of Vita Race per 1 litre of water (1:200). Spray the plant weekly with this nutrient solution, up to and including the third week of the flowering phase. For optimal results apply enough to make sure the liquid is dripping off the leaves. After dissolving in water stable up to 24 hours.

#### Composition

EC FERTILISER, Iron fertiliser solution: hydroxide (OH) and phosphate (PO<sub>4</sub>), 8% Water-soluble iron (Fe).

#### Packaging

Vita Race is available in 100ml, 250ml, 500ml & 1L bottle.
