

Alga Grow is a basic plant food that was created especially for soil-based cultivation. Alga Grow is used during the plant's growth phase. This fertiliser, which is based on algae, aids in healthy and balanced growth and good root development. Alga Grow provides a sound foundation for the plant to flower profusely in a subsequent phase.

Instructions

Shake well before use. Add a maximum of 4 ml Alga Grow per 1 litre of water (1:250). Use this solution each time the plants are irrigated during the growth phase. After dissolving in water stable for up to 24 hours.

Composition

Water, beet vinasse, amino acids and algae extracts. Organic NPK fertiliser (4-2-4). 4.2% Total nitrogen (N) of which 4.2% organic bound nitrogen, 2.0% water-soluble phosphorus pentoxide (P_2O_5), 4.3% water-soluble potassium oxide (K_2O).

Packaging

Alga Grow is available in 100ml, 250ml, 500ml & 1L bottle and 5L & 10L can.
