

PK 13-14 is a mineral fertiliser that provides plants with extra phosphorus and potassium in the flowering phase. This results in fruits that are more compact, solid and heavy.

#### Instructions

Shake well before use. Add 2 ml of PK 13-14 per 1 litre of water (1:500). After this, add the basic nutrient until the desired EC value is reached. Use this nutrient solution each time the plants are irrigated in the flowering phase.

#### Composition

EC FERTILISER, PK-fertiliser solution (0-13-14), 13% Water-soluble phosphorus pentoxide ( $P_2O_5$ ), 14% water-soluble potassium oxide ( $K_2O$ ).

#### Packaging

Pk 13-14 is available in 250ml, 500ml & 1L bottle and 5L can.
