

ACS WATERPACK®

Active Circulation System for Waterfarms

Highly efficient, easy to use, expandable recirculation system

The ACS system allows you to install a proper hydroponic system in small spaces, and to tailor size to your needs. The entire system runs off one air pump, and our innovative T-connector design means that nutrient solution is fully circulated in just thirty minutes!

Made out of the same high-quality plastic as our market leading AquaFarms, and with the same easy access 45L reservoir the ACS WaterPack® has a flip top reservoir lid for easy filling and emptying, and direct access to the nutrient solution.

- Roto-molded in France from super tough and durable recycled plastic.
- UV and light shielded for root protection.
- Versatile, adaptable and reliable.

The ACS Waterpack® comes with 4 [WaterFarm®](#) units as standard, and works best with one plant per pot. Expansion parts are available to add more WaterFarms if you wish, and you can also use the [ACS controller](#) with other brands of pot.
