

The **Ata** products are designed for the grower who wants to grow easily and swiftly, but still want a good end result. Return for a good price-quality ratio.

Bloombastic

Bloombastic is a high-quality cocktail of bio-minerals and bio-stimulators that is suitable for the last flowering and ripening phase (4-6 weeks). Bloombastic increases the sugar content of your crop and therefore the weight and the smell. By means of an explosion of sugar and flower production Bloombastic provides thick, dense, sweet-smelling flowers.

Compared with other liquid flowering products, Bloombastic contains over 50% more bio-minerals (phosphorus and potassium) for which absolutely no ballast substances have been used (sodium and chlorine). Bloombastic also has an enzymatic influence in several areas, and therefore has a stress-preventing and recovering influence on the plant.

Application

Can be used daily throughout the flowering stage as a supplement to the regular nutrition when irrigating the crop. Bloombastic can be used for cultivation on soil, hydro and coconut and is suitable for all irrigation and/or watering systems.

Growing tip

Atami especially recommends the use of Bloombastic in the last 4-6 weeks of the flowering (and ripening) stage for optimal results.

Quality guaranteed

The stimulators and liquid nutrients of Atami are packed and sealed lighttight under the twistable cap, so the quality remains guaranteed.

Available sizes:

- 100 ml
- 250 ml
- 325 ml
- 1250 ml
- 5,5 liter

Dosage:

0.5-1 ml per liter of nutrient solution.

NPK value:

0-20-21 (w/v)

EC between 1,0 – 2,5
