

B'cuzz products are intended for the professional grower who wants a maximum yield and return from his crop. For fruit with a deliciously sweet smell and taste.

## B'cuzz Coco A&B

Coconut substrates are still very popular as a cultivation medium. And that is not surprising, coconut has the buffering properties of soil and the accuracy of rock wool. This combination makes for properly growing and blooming plants. Coco nutrition A & B helps the crop to make even better use of the coconut and also ensures a biological balance in the coconut substrate.

### Application

This nutrition can only be used when the B'cuzz Coco nutrition A & B are mixed together in water simultaneously. Use water at room temperature (21 ° C) for the best result.

### Growing tip

Besides the Coco nutrition A & B the use of bio-stimulators is recommended.

### Quality guaranteed

The stimulators and liquid nutrients of Atami are packed and sealed lighttight under the twistable cap, so the quality remains guaranteed.
