

# BIO NOVA

## PERFORMANCE SCHEDULE

### MAIN FERTILIZERS

Cultivation in pots or in soil outside

Manual application BN SOIL Supermix

Application with a drip system BN HYDRO Supermix

For medium free growing with recirculation, Nutrient Film Technology

BN NFT AQUA Supermix

For cultivation on Rockwool, polyurethane, mapito, Nova Flakes soil or other

BN HYDRO Supermix

OR

BN NUTRI NOVA

Cultivation on BN Coco slabs or coir bricks

BN COCO NOVA

NOTE: You have to add the EC of your tapwater to the EC of the fertilizer to get the working EC. (pH between 5,50-6,80)

#### Growing period week:

1

2

Growing period  
18 hours light

Starting in BN-Soilmix A-quality,  
no fertilisation is needed for  
2-3 weeks, thereafter follow  
the schedule.

#### Flowering period week:

1

2

3

4

Start flowering period  
12 hours light

#### Flowering period week:

5

6

7

8...

Final flowering period  
12 hours light

Last week  
12 hours light

Dosages are per 100 litres.

Dosages are per 100 litres.

Dosages are per 100 litres.

250-300ml.

100ml, max.  
EC=1,80

### STIMULATING BOOSTER PRODUCTS

Root stimulant BN ROOTS

Natural stimulant/booster BN X-cel

Increases the quality and yield  
from all cultivars The Missing Link

Natural biocatalyst BN-ZYM

10 ml /litre once at planting

100ml, continuously

50ml, continuously

30ml, continuously  
(50ml, for NFT systems)

100ml, continuously

50ml, continuously

30ml, continuously (50ml, for NFT systems)

100ml, continuously

50ml, continuously

30ml, continuously (50ml, for NFT systems)

STOP  
giving any  
fertilizer.  
Only give  
your  
plants  
water  
with,  
if you like,  
BN  
Vitrasol  
50ml.

For dedicated  
growers, more  
products are  
available to  
increase the  
yield. Check
