To respond to the needs of larger producers, the Trimpro Automatik XL has a capacity and productivity ratio 5 times greater than its baby brother, the Trimpro Automatik. The fluted design of the grate facilitates the plants movement. When combined with the dimmer on the motor regulating the whirlwind velocity plus the height adjustable six (6) blade assembly, the operator is always in full and precise control of the Automatik XL and the finished product.

For trimming, separate the fresh flowers from the branches, put them into the upper container of the trimmer and let the Trimpro Automatik XL do the rest
