

Metre Square Tray Black

PRODUCT CODE: G112B

Product Information

This huge tray is one of the largest in our range with a depth of 12 cm and a massive internal capacity of 100 Litres. The Metre Square Tray features a series of shallow horizontal ridges on the internal base of the tray which aid drainage from plant pots.

Equally useful as a commercial drip / spillage tray for oils and chemical storage. There are many potential other applications such as a sand pit for kids, a plant irrigation display tray for garden centres and a mixing tray for cement to name but a few. Trays of this size and strength are very hard to find.

Made from recycled polypropylene.
