

# Big Drippa Watering Kit (Including 6 Adjustable Drippers)

PRODUCT CODE: G77

## Product Information

A gravity fed watering system offering the benefits of drip watering at a low price. As the Big Drippa is a self contained system, it is ideal for use in areas where there is no mains water supply. Often likened to a hospital I.V. Kit, the system features a 10.5 Litre water reservoir bag, 5 metres of irrigation tube and 6 adjustable drippers.

The system can be fitted to standard greenhouse extrusions using the hardware included in the kit. The reservoir will drain over a 24 hour period (depending on flow rate of each dripper) which will ensure plants are sufficiently watered for a two day period - ideal if you are away for the weekend.

The water reservoir bag and tubing are made from recycled PVC and the drippers from polycarbonate.
