

ATA

The **Ata** products are designed for the grower who wants to grow easily and swiftly, but still want a good end result. Return for a good price-quality ratio.

Atazyme

Makes the absorption of nutrition easier for the plant and reduces the risk of over-fertilization. Stimulates the soil life and thus has an enormous positive impact on the development of the root system and growth and flowering of the crop. Atazyme breaks down dead plants and root residues in the substrate and thus reduces the risk of soil diseases.

Application

Suitable as an addition to the regular diet for growing on soil, hydro and cocos. Can best be used once a week throughout the growing and blooming cycle.

Growing tip

Atazyme is also very effective in the (partly) reuse of the substrate.

Quality guaranteed

The stimulators and liquid nutrients of Atami are packed and sealed lighttight under the twistable cap, so the quality remains guaranteed.

Available sizes:

- 1 liter
- 5 liter
- 10 liter

Dosage:

2 ml per liter of nutrient water.

NPK value:

0-0-6 (w/v)
