

BioBud®

bloom booster

BioBud is a powerful bloom stimulator that generates explosive flowering and massive fruit production. BioBud increases metabolic activity and mineral uptake by utilizing bio-stimulants and organic transport enhancers. This induces abundant, dense floral clusters during the crucial flowering and fruiting phases. The results are spectacular flowering and more flavorful fruits. BioBud works naturally, and allows plants to express the best of their genetic potential.

For all plants, during the flowering phase of plant growth.

Use with all nutrients, in hydroponics, in any substrate, and in your garden.

Applications: 3 to 5 ml/L in hydro and soil - 3 ml/L in foliar spray. (see Bio Bloom)
