

# STONE WOOL SUBSTRATE RFX-1™

## Stone wool substrate RFX-1™

### What is RFX-1™?

RFX-1™ is a Foam Wool Mix delivered in cubes of 2 x 2 x 2 x 2 cm, mixed with Foam flakes, specially developed for agriculture and horticulture. This ensures a good ratio of water and oxygen in the pot or container. Because we use Earthwool®, our product is almost 100% natural. The raw materials used are completely new and no recycled raw materials are processed in RFX-1™ mix. As a result, there is no risk of infection with mould or diseases from outside.

### Smart packaging

A unique packaging system allows us to pack 3 bags of RFX-1™ mix per box. The bags are filled with at least 80 litres per bag. This way, you can be sure that the RFX-1™ mix arrives at your company in good condition.

### Ready to use

All our substrates are PH and EC neutral and ready to use. After unpacking, shake the bags to the correct volume of 80 litres and spread them over the pots/bins or other growing systems. Do not press or compress the substrates. After this, only moisten with water when inserting the plants or flowers. Daily watering according to the needs of the plant or flower ensures the best result.

# RFX-1

**Earthwool™ substrate mixed  
with 15% agro foam**

If you would like different packaging, this is of course negotiable.
