

ENFORCER LARGE REFLECTOR

The Enforcer is Adjust-A-Wings entry level model, making a premium reflector affordable to all growers. They offer no contest to the superior Avengers and Defenders in terms of reflectivity or durability but will outperform the majority of standard reflectors that are on the market. They offer 86% reflectivity and are an ideal introduction to quality reflectors for the new grower just getting started out.

The Enforcer is available in three sizes: small, medium and large.
