

Bio Roots

For all growing methods: hydroponics and soil

Bio Roots is a growth and bloom activator

It stimulates the development of micro organisms in the root mass and promotes the growth of roots and rootlets.

It improves the root's biotope and hardens the root cap. This activates the development of a vigorous root mass and a better settlement of the plant in its environment.

It allows better resistance to disease and pathogenic moulds (powdery mildew, damping off in seedlings and cuttings, etc).

Bio Roots, Bio Bloom and Bio Protect exist in 30 ml, 60 ml, 0,5 l, 1 l & 5 l

How to use Bio Roots?

Add Bio Roots, along with the nutrients, to your solution. Follow the instructions on the labels and read the nutritive programs for each of our nutrients.

When to use Bio Roots?

Use Bio Roots during the first weeks of growth, in hydroponics and soil.

Which are the advantages of Bio Roots?

Bio Roots improves the root environment and helps to develop a strong root system.

When will I see the results?

Very quickly, after only a couple of days, you will notice a clear improvement in the health and strength of your plants, their growth rate, the quantity of flowers and fruit produced, and the generosity of your crops.

Why use Bio Roots?

Bio Roots is an inexpensive 100% organic product compared to its strong concentration, the quantities needed, and the efficiency of its action.
