

perlite

Perlite is baked volcanic rock that provides an airy substrate and improved drainage. Use Perlite to improve the structure of the soil. Perlite can be broadly used. It has a consistent quality, is germ-free and provides the ideal water / air ratio. Perlite stimulates root development. The product carries the RHP quality mark.

#### Instructions

Mix 10 - 35% Perlite into the soil.

#### Composition

100% Perlite

#### Packaging

Perlite is available in 10L & 60L bag.
