### Useful tips for the use of Veganics fertilizing scheme

- First add water to the feed vessel, then add the main nutrients and stir well.
- In areas of soft water it is recommended to add Ca 15 to the main nutrients.
- Leave the mix for one hour and then adjust the pH value to pH 5.8 if necessary.
- The dosage of the main nutrient can be adjusted in steps of  $\pm 10\%$ .
- Do not use nutrients in the last week before harvest.
- Use BN Roots when planting and repeat after 30 days. In periods of high stress in the plants we recommend using BN Roots every week.
- Dosage may be adjusted at your discretion.
