

DEFENDER MEDIUM REFLECTOR

The Defender Reflector is an industrial strength model. The surface of the reflector is a 'titanium white' heat resistant powder coat that produces a very diffuse and even spread light foot print. It maintains a reflective quality of 92%.

The base metal is H18 aluminium alloy (3% magnesium) which is strong, yet springy, giving the reflector consistently perfect parabolic curves with even the roughest of handling – perfect for the grower with an ever changing grow room environment.

Dimensions

Overall dimension at Widest Setting 70cm x 55cm (27.5" x 21.5")
Perfect for a 400w or 600w lamp

Features

Double parabolic lighting reflector
Twice the power and efficiency of most other reflectors
Corrosion resistant
92% reflective
Sturdy reflector with perfect shape
