

MOUNTAIN AIR® 3-MODE ENVIROMENTAL CONTROLLER

A digital 3-mode Environmental Controller is included in all our fans for free to provide the user with total control. One mode allows for manual control of the fan's speed, while two thermostat-controlled modes either turn off the fan, or reduce fan speed when the temperature of the room falls below set temperature.

Digital 3-mode environmental control thermostat allows

1. Manual fan speed control
2. Fan on and off when used as heat extraction
3. Adjust fan to desired speed when temperature falls below set temperature
